## ZILR announces NP-F970 USB-C PD Battery

**Melbourne, Australia – ZILR Pty Ltd** launches a new NP-F970 USB-C PD Battery to meet the needs of the pro market.

Featuring USB-C PD to power an additional source with fast charging output and a high capacity of 72.36 Wh 10,050 mAh for longer run times on set.

The base terminal supports the standard 7.4V, while the USB-C PD supports various outputs that include 5V/3A, 9V/2A, 12V/1.5A, 15V/1.2A and 20V/0.9A.

ZILR's NP-F970 USB-C PD Battery is compatible with a wide range of USB-C devices when using USB-C cable adapters\* as well as cameras that are capable of USB-C continuous power mode.

There are several workflows to power devices:

- Directly into a NP-F L-Series device
- Power bank mode via USB-C, powering devices including phones and tablets without a NP-F device
- On a monitor/recorder that supports a NP-F slot, and using the USB-C to a dummy adaptor to power a camera, powering both devices at the same time
- USB-C into a camera that supports continuous power over USB-C while turned on

A convenient LED power indicator located on the battery lets you know the charge level at a glance.

The battery may also be directly charged via USB-C for greater compatibility with USB-C AC wall chargers. ZILR's new 65W USB-C PD AC wall charger is recommended for this purpose.
